

Flying for a Lifetime

A bit of trivia: Every cell in the human body is replaced at least once every ten years. You are, quite literally, not the same person you were a decade ago. You're also (less literally) not the same pilot. Experience, physical stamina, risk tolerance, mental acuity: They all shift over the years, in obvious and not-so-obvious ways. Question is, how do you adjust? Our latest seminar delves into the forces that shape us as pilots, and explores different ways to maintain the same high level of safety over a lifetime of flying.

Directions: Air Safety Institute Seminar

A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?
